Foundational Research Unit *New York, NY*

- Pretraining core contributor to the Gemini, Gemini Omni, and Genie workstreams, focusing on 3D understanding and generation capabilities of frontier models.
- Leading the Geo–Gemini Vision project, a 20+ contributor effort that has landed multiple pretraining datasets improving Gemini's spatial understanding.
- Contributed multiple petabytes of pretraining data, including the majority of all 3D generation data across Google DeepMind's media-generation models.

Google DeepMind — Senior Research Scientist May 2024 – Oct. 2025
Foundational Research Unit *New York, NY*

- Contributed pretraining data that made Gemini 3 the first model to surpass human experts at geoguessing.
- Led Geo's Foundational Features project, training 3D models to build a petabyte-scale 3D feature database supporting open-vocabulary scene-understanding queries for the Google Maps team.

Google Research — Research Scientist May 2021 – May 2024
Machine Perception — promoted to Senior Research Scientist, Oct. 2023 *Mountain View, CA & New York, NY*

- Published 2D3DNet, the 3D understanding backbone for all of Google Maps since 2021 — driving over 30 million map updates and supporting routing, HD maps, 3D reconstruction, and indoor Immersive View. Over one quadrillion 3D points served.
